## **A Practitioner's Guide to State and Local Population Projections: 37 (The Springer Series on Demographic Methods and Population Analysis) Stanley K. Smith, Jeff Tayman, David A. Swanson**

This book focuses on the methodology and analysis of state and local population projections. It describes the most commonly used data sources and application techniques for four types of projection methods: cohort-component, trend extrapolation, structural models, and microsimulation. It covers the components of population growth, sources of data, the formation of assumptions, the development of evaluation criteria, and the determinants of forecast accuracy. It considers the strengths and weaknesses of various projection methods and pays special attention to the unique problems that characterize small-area projections. The authors provide practical guidance to demographers, planners, market analysts, and others called on to construct state and local population projections. They use many examples and illustrations and present suggestions for dealing with special populations, unique circumstances, and inadequate or unreliable data. They describe techniques for controlling one set of projections to another, for interpolating between time points, for sub-dividing age groups, and for constructing projections of population-related variables (e.g., school enrollment, households). They discuss the role of judgment and the importance of the political context in which projections are made. They emphasize the “utility” of projections, or their usefulness for decision making in a world of competing demands and limited resources. This comprehensive book will provide readers with an understanding not only of the mechanics of the most commonly used population projection methods, but also of the many complex issues affecting their construction, interpretation, evaluation, and use.?

**From reader reviews:**

**Jimmy Hicks:**

Why don't make it to be your habit? Right now, try to prepare your time to do the important action, like looking for your favorite book and reading a reserve. Beside you can solve your long lasting problem; you can add your knowledge by the guide entitled A Practitioner's Guide to State and Local Population Projections: 37 (The Springer Series on Demographic Methods and Population Analysis). Try to stumble through book A Practitioner's Guide to State and Local Population Projections: 37 (The Springer Series on Demographic Methods and Population Analysis) as your good friend. It means that it can to get your friend when you really feel alone and beside that of course make you smarter than ever. Yeah, it is very fortunated in your case. The book makes you more confidence because you can know anything by the book. So , we need to make new experience as well as knowledge with this book.

**David Sweet:**

The e-book with title A Practitioner's Guide to State and Local Population Projections: 37 (The Springer Series on Demographic Methods and Population Analysis) possesses a lot of information that you can study it. You can get a lot of benefit after read this book. This specific book exist new expertise the information that exist in this publication represented the condition of the world now. That is important to yo7u to find out how the improvement of the world. That book will bring you with new era of the internationalization. You can read the e-book in your smart phone, so you can read it anywhere you want.

**Augustus Chase:**

As we know that book is essential thing to add our expertise for everything. By a book we can know everything we want. A book is a set of written, printed, illustrated as well as blank sheet. Every year has been exactly added. This book A Practitioner's Guide to State and Local Population Projections: 37 (The Springer Series on Demographic Methods and Population Analysis) was filled regarding science. Spend your free time to add your knowledge about your research competence. Some people has diverse feel when they reading a new book. If you know how big benefit from a book, you can sense enjoy to read a guide. In the modern era like currently, many ways to get book that you just wanted.

**Barbara Simon:**

That reserve can make you to feel relax. This book A Practitioner's Guide to State and Local Population Projections: 37 (The Springer Series on Demographic Methods and Population Analysis) was colorful and of course has pictures around. As we know that book A Practitioner's Guide to State and Local Population Projections: 37 (The Springer Series on Demographic Methods and Population Analysis) has many kinds or category. Start from kids until youngsters. For example Naruto or Investigator Conan you can read and think that you are the character on there. Therefore not at all of book are make you bored, any it makes you feel

happy, fun and chill out. Try to choose the best book to suit your needs and try to like reading in which.
