## Democracy and Crisis: Democratising Governance in the Twenty-First Century

Recent years have seen near constant reports on the failures of governance and the crisis of democracy. The critical nexus between the ever-increasing array of crises that modern representative democracies face and the widening reliance on an array of undemocratic governance mechanisms and networks to meet and manage these crises needs urgent and in-depth scholarly attention. This book therefore seeks to investigate the ways in which representative democracy might better handle environmental, political, social and economic crises in the twenty-first century by making the mechanisms of governance more democratic. By examining cases such as the global financial crisis, the arab revolutions, Wikileaks and climate change, this volume highlights the tensions between governance and democracy during times of crisis and examines the prospects of democratising governance in the twenty-first century and beyond.
