Lofts

Marcus Field, Mark Irving

Lofts Marcus Field, Mark Irving

Establishing domestic spaces in buildings originally constructed for industrial use - the loft phenomenon - has become one of the most significant cultural movements of the late twentieth century. Featuring the juxtaposition of contemporary living with the remnants of a building's original shell, even the most simple loft will have the dramatism often lacking in all but the best examples of contemporary design. Written by two young architectural critics and designed by a forward-looking graphics team, this new book tells, with the aid of full-colour photographs, plans and drawings, the story of some of the world's most exciting and challenging loft conversions. Around thirty architect-designed lofts- many previously unpublished - are featured, showing how designers have overcome specific problems generic to lofts.
