Atlas of Otoscopy Jack Pulec, Christian Deguine

For professionals interested in hearing function and dysfunction, this book brings together in a convenient form high-quality clinical photographs of otoscopic anatomy, pathology, and surgery and illustrates the techniques of otoscopy. It includes a comprehensive series of clinical cases, including 60 cases that appeared in the popular Otoscopic Clinic Section of the Ear, Nose, and Throat Journal over the last 6 years and 60 totally new cases, illustrating a variety of common and unusual problems. Included with the photographs are case studies that highlight the diagnostic and therapeutic insights of world-renowned otologists and allow the reader to correlate the appearance of the tympanic membrane with its clinical effects. The images and case studies are designed to show interesting features of many of the more common and clinically important abnormalities seen by practicing otolaryngologists.
