## **The Making of the Pacemaker: Celebrating a Lifesaving Invention** Wilson Greatbatch

Wilson Greatbatch, an electrical engineer in Buffalo, NY, had a brilliant idea and the technical know-how to turn his idea into a practical device, for which millions of people today are grateful. This is the story of the first pacemaker by the man who invented it.

Intrigued by electronics from the time he was a boy, Greatbatch earned a degree in electrical engineering from Cornell University. It was during his time at Cornell that he first became interested in the medical applications of electronic devices. He learned about the problem of heart blocking at Cornell and knew it was fixable in principle, but at the time the vacuum-tube technology was impractical for medical use.

By the 1950s he was teaching at the University of Buffalo School of Electrical Engineering and the first silicon transistors had just been invented. While using one of the new \$90 transistors on another project Greatbatch discovered by accident, as he describes it, the proper design for a blocking oscillator that he immediately knew would work as a pacemaker. He soon interested Dr. William Chardack, chief of surgery at the Veteran's Administration Hospital in Buffalo, in the project, and by 1958 they were conducting animal experiments.

Greatbatch quit his job and for the next two years devoted full-time in his wood-heated barn workshop to building one pacemaker after another. During this time he built fifty pacemakers, forty of which went into animal experiments. By 1960 he and a team of surgeons and engineers had gained enough knowledge from the trial and error of the animal experiments to feel ready to begin implanting the remaining ten devices in people. The first trials went well and Greatbatch's device extended the lives of many of these seriously ill patients by decades. What followed were years of hard work refining the battery and electrode technology, marketing the pacemaker to an initially skeptical medical community, and keeping the company that manufactured the device profitable.

Reminiscent of Edison's many dogged attempts to find the right solution in pursuit of an ingenious idea, The Making of the Pacemaker is a human-interest story at its best and also an important firsthand account for the medical archives of an invention that today saves millions of lives.

### **From reader reviews:**

#### **Anthony Hanna:**

Have you spare time for just a day? What do you do when you have more or little spare time? Yeah, you can choose the suitable activity to get spend your time. Any person spent their particular spare time to take a walk, shopping, or went to the Mall. How about open or even read a book allowed The Making of the Pacemaker: Celebrating a Lifesaving Invention? Maybe it is being best activity for you. You realize beside you can spend your time with the favorite's book, you can smarter than before. Do you agree with the opinion or you have some other opinion?

#### **William Powell:**

This The Making of the Pacemaker: Celebrating a Lifesaving Invention tend to be reliable for you who want to be a successful person, why. The explanation of this The Making of the Pacemaker: Celebrating a Lifesaving Invention can be among the great books you must have is giving you more than just simple reading food but feed anyone with information that possibly will shock your earlier knowledge. This book is actually handy, you can bring it almost everywhere and whenever your conditions both in e-book and printed types. Beside that this The Making of the Pacemaker: Celebrating a Lifesaving Invention giving you an enormous of experience for example rich vocabulary, giving you demo of critical thinking that we know it useful in your day task. So , let's have it and revel in reading.

#### **Allison Morales:**

Reading a publication tends to be new life style on this era globalization. With reading you can get a lot of information which will give you benefit in your life. With book everyone in this world can certainly share their idea. Textbooks can also inspire a lot of people. A lot of author can inspire their very own reader with their story or perhaps their experience. Not only the storyline that share in the textbooks. But also they write about advantage about something that you need example of this. How to get the good score toefl, or how to teach your children, there are many kinds of book that exist now. The authors on this planet always try to improve their expertise in writing, they also doing some study before they write to their book. One of them is this The Making of the Pacemaker: Celebrating a Lifesaving Invention.

#### **William Sam:**

Spent a free time and energy to be fun activity to accomplish! A lot of people spent their free time with their family, or their own friends. Usually they carrying out activity like watching television, planning to beach, or picnic from the park. They actually doing ditto every week. Do you feel it? Will you something different to fill your own personal free time/ holiday? Could possibly be reading a book can be option to fill your cost-free time/ holiday. The first thing you will ask may be what kinds of book that you should read. If you want to try out look for book, may be the publication untitled The Making of the Pacemaker: Celebrating a Lifesaving Invention can be very good book to read. May be it is usually best activity to you.
