**Portable reference offers radiographic technologists, junior residents, medical students, primary care providers, and physical therapists quick access to high quality images and concise discussions of the 200 most common pathologies visualized on CT and MRI for use at the point of care.**

## **Market / Audience**

**Primary Market:** Radiologic Technologists (7,500+ new rad techs per year in the USA); book would be recommended in RadTech programs, and required when there is a CT/MRI Pathology course or specialty. This would also appeal to students prepping for the ARRT exam.

Junior Residents and Medical Students (approx. 152,000 each year)

Primary Care Providers (MDs, PAs, NPs)

Physical Therapists

## **About the Book**

*CT & MRI Pathology: Second Edition* is a portable reference of more than 200 common pathologies seen in CT and on MRI. It concisely reviews the pathology, etiology, signs and symptoms, imaging characteristics, treatment, and prognosis for each disease/disorder and includes crisp, high-quality images to accompany every discussion. New to the second edition are an additional 90 disease topics - bringing the total to 200, a new design, and 8 pages of color images.

There have been a number of technological changes in this field in the past five years since the last edition published. We can now see images with thinner slices, multiple axis, and a transition away from nuclear medicine as CT and MRI technology has been enhanced. As an example, five years ago, 16-slice CT scans were the norm; now it's 64-slice - this is a higher resolution and allows for much better treatment and diagnosis. The new edition will include state of the art images for each pathology covered.

## **Key Selling Features**

- 200 common pathologies seen on CT & MRI CD-ROM will contain 400 high-quality images, many unique to the CD. Organized by body system for easy reference.
- Portable for quick lookups at the point of care
- 400+ state of the art CTs and MRIs with concise explanations of each pathology
- Written by a radiographic technologist and a radiologist

## About the Authors

**Michael L. Grey, MS, RT(R) (MR) (CT)** is Assistant Professor of Radiologic Sciences at Southern Illinois University (Carbondale, IL). He actively teaches review courses for rad techs certifying in MR and CT.

**Jagan M. Ailinani, MD** is a radiologist and formerly Clinical Professor of Radiology and Community medicine at Southern Illinois University (Carbondale, IL).
