As an addition to the European postgraduate training system for young neurosurgeons, we began to publish in 1974 this series of Advances and Technical Standards in Neurosurgery which was later sponsored by the European Association of Neurosurgical Societies. This series was first discussed in 1972 at a combined meeting of the Italian and German Neurosurgical Societies in Taormina, the founding fathers of the series being Jean Brihaye, Bernard Pertuiset, Fritz Loew and Hugo Krayenbuhl. Thus were established the principles of European co operation which have been born from the European spirit, flourished in the European Association, and have been associated throughout with this series. The fact that the English language is now the international medium for communication at European scientific conferences is a great asset in terms of mutual understanding. Therefore we have decided to publish all contributions in English, regardless of the native language of the authors. All contributions are submitted to the entire editorial board before publication of any volume for scrutiny and suggestions for revision. Our series is not intended to compete with the publications of original scientific papers in other neurosurgical journals. Our intention is, rather, to present fields of neurosurgery and related areas in which important recent advances have been made. The contributions are written by specialists in the given fields and constitute the first part of each volume.

From reader reviews:

Lawrence Rector:

Spent a free time and energy to be fun activity to complete! A lot of people spent their sparetime with their family, or their particular friends. Usually they doing activity like watching television, planning to beach, or picnic within the park. They actually doing ditto every week. Do you feel it? Do you wish to something different to fill your own personal free time/ holiday? Could possibly be reading a book can be option to fill your free of charge time/ holiday. The first thing you ask may be what kinds of guide that you should read. If you want to try look for book, may be the book untitled Advances and Technical Standards in Neurosurgery: 27 can be fine book to read. May be it might be best activity to you.

Rebecca Clark:

Reading can called imagination hangout, why? Because when you find yourself reading a book specially book entitled Advances and Technical Standards in Neurosurgery: 27 your head will drift away trough every dimension, wandering in every single aspect that maybe unfamiliar for but surely will end up your mind friends. Imaging every word written in a e-book then become one application form conclusion and explanation which maybe you never get previous to. The Advances and Technical Standards in Neurosurgery: 27 giving you yet another experience more than blown away your mind but also giving you useful facts for your better life within this era. So now let us show you the relaxing pattern the following is your body and mind are going to be pleased when you are finished reading through it, like winning a. Do you want to try this extraordinary investing spare time activity?

Neil Espinoza:

Your reading 6th sense will not betray a person, why because this Advances and Technical Standards in Neurosurgery: 27 publication written by well-known writer we are excited for well how to make book that can be understand by anyone who else read the book. Written in good manner for you, still dripping wet every ideas and publishing skill only for eliminate your own hunger then you still skepticism Advances and Technical Standards in Neurosurgery: 27 as good book but not only by the cover but also with the content. This is one book that can break don't determine book by its deal with, so do you still needing a different sixth sense to pick this kind of!? Oh come on your reading sixth sense already alerted you so why you have to listening to yet another sixth sense.

Clark Abeyta:

Within this era which is the greater individual or who has ability in doing something more are more important than other. Do you want to become among it? It is just simple method to have that. What you need to do is just spending your time not much but quite enough to have a look at some books. One of several books in the top collection in your reading list will be Advances and Technical Standards in Neurosurgery:

27. This book that is certainly qualified as The Hungry Mountains can get you closer in growing to be precious person. By looking right up and review this e-book you can get many advantages.
