Metric Spaces (Springer Undergraduate Mathematics Series) Mícheál O'Searcoid
The abstract concepts of metric spaces are often perceived as difficult. This book offers a unique approach to the subject which gives readers the advantage of a new perspective on ideas familiar from the analysis of a real line. Rather than passing quickly from the definition of a metric to the more abstract concepts of convergence and continuity, the author takes the concrete notion of distance as far as possible, illustrating the text with examples and naturally arising questions. The book provides a thorough exposition of all the standard necessary results of the theory and, in addition, includes selected topics not normally found in introductory books, such as: the Tietze Extension Theorem; the Hausdorff metric and its completeness; and the existence of curves of minimum length. With its many examples, careful illustrations, and full solutions to selected exercises, this book provides a gentle introduction that is ideal for self-study and an excellent preparation for applications.

From reader reviews:

Christopher Patterson:

Reading a guide can be one of a lot of task that everyone in the world enjoys. Do you like reading book and so. There are a lot of reasons why people love it. First reading a book will give you a lot of new details. When you read a e-book you will get new information since book is one of numerous ways to share the information or maybe their idea. Second, reading a book will make a person more imaginative. When you reading through a book especially fiction book the author will bring one to imagine the story how the personas do it anything. Third, you can share your knowledge to some others. When you read this Metric Spaces (Springer Undergraduate Mathematics Series), you could tells your family, friends and also soon about yours guide. Your knowledge can inspire others, make them reading a publication.

Edward Carroll:

Playing with family inside a park, coming to see the ocean world or hanging out with buddies is thing that usually you have done when you have spare time, in that case why you don't try point that really opposite from that. One particular activity that make you not experience tired but still relaxing, trilling like on roller coaster you are ride on and with addition details. Even you love Metric Spaces (Springer Undergraduate Mathematics Series), you are able to enjoy both. It is excellent combination right, you still would like to miss it? What kind of hang-out type is it? Oh occur its mind hangout guys. What? Still don't buy it, oh come on its called reading friends.

Bryon Diaz:

You may spend your free time to study this book this reserve. This Metric Spaces (Springer Undergraduate Mathematics Series) is simple to develop you can read it in the park your car, in the beach, train along with soon. If you did not possess much space to bring typically the printed book, you can buy often the e-book. It is make you better to read it. You can save the book in your smart phone. And so there are a lot of benefits that you will get when you buy this book.

Sophie Clark:

As we know that book is very important thing to add our expertise for everything. By a guide we can know everything we really wish for. A book is a set of written, printed, illustrated or maybe blank sheet. Every year had been exactly added. This reserve Metric Spaces (Springer Undergraduate Mathematics Series) was filled regarding science. Spend your time to add your knowledge about your technology competence. Some people has different feel when they reading a new book. If you know how big selling point of a book, you can really feel enjoy to read a guide. In the modern era like now, many ways to get book that you wanted.
