## **African Greenhouse Gas Emission Inventories and Mitigation Options: Forestry, Land-Use Change, and Agriculture: Johannesburg, South Africa 29 May - June 1995**

As atmospheric concentrations of greenhouse gases continue to increase, so does the potential for atmospheric warming and associated climate change. In an effort to address the threat of global climate change, 155 countries signed the UN Framework Convention on Climate Change at the Earth Summit in Rio de Janeiro in June 1992. As of the first session of the Conference of the Parties, 128 nations had ratified the Convention. Among their other commitments, Parties to the Convention must develop and periodically update national inventories of net anthropogenic greenhouse gas emissions using comparable methodologies, and must develop and implement national programs to mitigate greenhouse gas emissions.

To further the development of emission inventories and mitigation options within the African context, 64 governmental and non-governmental scientists and policy analysts from 23 nations gathered at a workshop near Johannesburg, South Africa from 29 May to 2 June 1995. The workshop focused on forestry, land-use change, and agriculture, because these sectors not only are responsible for the majority of emissions from the continent and provide promising opportunities for emissions mitigation, but also are a vital component of African economic growth and development.

This book presents the workshop's major conclusions and findings, as well as individual papers that were prepared for the workshop, each of which was peer-reviewed and accepted for publication as part of the workshop process. The papers cover four areas: (1) issues are associated with data collection and emission factor determination; (2) problems associated with applying the IPCC inventory methodologies in Africa; (3) results of national inventory assessments in Africa; and (4) possible emissions mitigation options and methods for evaluating their potential viability.

As the first book dedicated solely to greenhouse gas emissions and mitigation options in Africa, this will be an invaluable resource to scientists, policymakers, and development specialists interested in global climate change and Africa.

### **From reader reviews:**

#### **Stephen Stover:**

The book African Greenhouse Gas Emission Inventories and Mitigation Options: Forestry, Land-Use Change, and Agriculture: Johannesburg, South Africa 29 May - June 1995 will bring one to the new experience of reading a new book. The author style to explain the idea is very unique. If you try to find new book to study, this book very suitable to you. The book African Greenhouse Gas Emission Inventories and Mitigation Options: Forestry, Land-Use Change, and Agriculture: Johannesburg, South Africa 29 May - June 1995 is much recommended to you you just read. You can also get the e-book through the official web site, so you can easier to read the book.

#### **John Tillery:**

The book with title African Greenhouse Gas Emission Inventories and Mitigation Options: Forestry, Land-Use Change, and Agriculture: Johannesburg, South Africa 29 May - June 1995 has lot of information that you can study it. You can get a lot of benefit after read this book. This specific book exist new know-how the information that exist in this reserve represented the condition of the world now. That is important to you to find out how the improvement of the world. This specific book will bring you throughout new era of the internationalization. You can read the e-book with your smart phone, so you can read the item anywhere you want.

#### **James Hutchinson:**

People live in this new day time of lifestyle always try and and must have the free time or they will get lot of stress from both way of life and work. So , whenever we ask do people have extra time, we will say absolutely yes. People is human not only a robot. Then we consult again, what kind of activity have you got when the spare time coming to you actually of course your answer may unlimited right. Then do you try this one, reading publications. It can be your alternative in spending your spare time, the actual book you have read is African Greenhouse Gas Emission Inventories and Mitigation Options: Forestry, Land-Use Change, and Agriculture: Johannesburg, South Africa 29 May - June 1995.

#### **Jesse Ward:**

As we know that book is essential thing to add our know-how for everything. By a e-book we can know everything we really wish for. A book is a list of written, printed, illustrated or maybe blank sheet. Every year ended up being exactly added. This guide African Greenhouse Gas Emission Inventories and Mitigation Options: Forestry, Land-Use Change, and Agriculture: Johannesburg, South Africa 29 May - June 1995 was filled regarding science. Spend your extra time to add your knowledge about your technology competence. Some people has several feel when they reading some sort of book. If you know how big benefit of a book, you can feel enjoy to read a book. In the modern era like now, many ways to get book that you just wanted.
