**Great Economic Thinkers from Antiquity to the Historical School: Translations from the series Klassiker der Nationalökonomie (Routledge Studies in the History of Economics) Bertram Schefold**

This book contains commentaries from the series "Klassiker der Nationalökonomie" (classics of economics), which have been translated into English for the first time. This selection focuses on neglected, but notable writers in a deserted sub-discipline, localising the beginning of economic science not with Adam Smith, but with the moral question of usury and the good life in Antiquity. Bertram Schefold's choice of authors for the "Klassiker" series, which he has edited since 1991, and his comments on the various re-edited works are proof of his highly original and thought-provoking interpretation of the history of economic thought (HET).

This volume is an important contribution to HET not only because it delivers original and fresh insights about such well-known figures as Aristotle, Jevons or Wicksell, but also because it deals with authors and ideas who have been forgotten or neglected in the previous literature. In this regard Schefold's book could prove to be seminal for the field of the history of economic thought, for in the age of globalisation our usual restriction to the thinkers of Western Europe and the USA might eventually be overcome.

This book will give the reader a far broader view of economics compared to that of the latest research. This volume is suitable for those who are interested in and study history of economic thought as well as economic theory and philosophy.
