## Algebras, Quivers and Representations: The Abel Symposium 2011: 8 (Abel Symposia)

This book features survey and research papers from The Abel Symposium 2011: Algebras, quivers and representations, held in Balestrand, Norway 2011. It examines a very active research area that has had a growing influence and profound impact in many other areas of mathematics like, commutative algebra, algebraic geometry, algebraic groups and combinatorics. This volume illustrates and extends such connections with algebraic geometry, cluster algebra theory, commutative algebra, dynamical systems and triangulated categories. In addition, it includes contributions on further developments in representation theory of quivers and algebras.

*Algebras, Quivers and Representations* is targeted at researchers and graduate students in algebra, representation theory and triangulate categories.
