# Schema Matching and Mapping (Data-Centric Systems and Applications)

## Schema Matching and Mapping (Data-Centric Systems and Applications)

Requiring heterogeneous information systems to cooperate and communicate has now become crucial, especially in application areas like e-business, Web-based mash-ups and the life sciences. Such cooperating systems have to automatically and efficiently match, exchange, transform and integrate large data sets from different sources and of different structure in order to enable seamless data exchange and transformation.

The book edited by Bellahsene, Bonifati and Rahm provides an overview of the ways in which the schema and ontology matching and mapping tools have addressed the above requirements and points to the open technical challenges. The contributions from leading experts are structured into three parts: large-scale and knowledge-driven schema matching, quality-driven schema mapping and evolution, and evaluation and tuning of matching tasks. The authors describe the state of the art by discussing the latest achievements such as more effective methods for matching data, mapping transformation verification, adaptation to the context and size of the matching and mapping tasks, mapping-driven schema evolution and merging, and mapping evaluation and tuning. The overall result is a coherent, comprehensive picture of the field.

With this book, the editors introduce graduate students and advanced professionals to this exciting field. For researchers, they provide an up-to-date source of reference about schema and ontology matching, schema and ontology evolution, and schema merging.

### **From reader reviews:**

#### **Mark Logan:**

As people who live in typically the modest era should be change about what going on or information even knowledge to make all of them keep up with the era that is certainly always change and move ahead. Some of you maybe can update themselves by studying books. It is a good choice for yourself but the problems coming to an individual is you don't know what kind you should start with. This Schema Matching and Mapping (Data-Centric Systems and Applications) is our recommendation to make you keep up with the world. Why, as this book serves what you want and wish in this era.

#### **Noah Cale:**

Playing with family inside a park, coming to see the coastal world or hanging out with friends is thing that usually you have done when you have spare time, and then why you don't try thing that really opposite from that. One particular activity that make you not experience tired but still relaxing, trilling like on roller coaster you already been ride on and with addition associated with. Even you love Schema Matching and Mapping (Data-Centric Systems and Applications), you may enjoy both. It is excellent combination right, you still want to miss it? What kind of hang-out type is it? Oh can occur its mind hangout guys. What? Still don't have it, oh come on its referred to as reading friends.

#### **Irene Weinstein:**

As we know that book is important thing to add our information for everything. By a publication we can know everything we want. A book is a range of written, printed, illustrated as well as blank sheet. Every year had been exactly added. This reserve Schema Matching and Mapping (Data-Centric Systems and Applications) was filled concerning science. Spend your extra time to add your knowledge about your research competence. Some people has several feel when they reading a book. If you know how big benefit from a book, you can truly feel enjoy to read a e-book. In the modern era like today, many ways to get book which you wanted.

#### **Ann Cason:**

Reading a book make you to get more knowledge from that. You can take knowledge and information originating from a book. Book is prepared or printed or descriptive from each source in which filled update of news. On this modern era like today, many ways to get information are available for a person. From media social similar to newspaper, magazines, science publication, encyclopedia, reference book, story and comic. You can add your understanding by that book. Ready to spend your spare time to open your book? Or just in search of the Schema Matching and Mapping (Data-Centric Systems and Applications) when you necessary it?
