## Semantic Models for Multimedia Database Searching and Browsing (Advances in Database Systems)

Shu-Ching Chen, R.L. Kashyap, Arif Ghafoor

*Semantic Models for Multimedia Database Searching and Browsing* begins with the introduction of multimedia information applications, the need for the development of the multimedia database management systems (MDBMSs), and the important issues and challenges of multimedia systems. The temporal relations, the spatial relations, the spatio-temporal relations, and several semantic models for multimedia information systems are also introduced. In addition, this book discusses recent advances in multimedia database searching and multimedia database browsing. More specifically, issues such as image/video segmentation, motion detection, object tracking, object recognition, knowledge-based event modeling, content-based retrieval, and key frame selections are presented for the first time in a single book. Two case studies consisting of two semantic models are included in the book to illustrate how to use semantic models to design multimedia information systems.

*Semantic Models for Multimedia Database Searching and Browsing* is an excellent reference and can be used in advanced level courses for researchers, scientists, industry professionals, software engineers, students, and general readers who are interested in the issues, challenges, and ideas underlying the current practice of multimedia presentation, multimedia database searching, and multimedia browsing in multimedia information systems.

### **From reader reviews:**

#### **Alejandro Koenig:**

This Semantic Models for Multimedia Database Searching and Browsing (Advances in Database Systems) book is absolutely not ordinary book, you have after that it the world is in your hands. The benefit you get by reading this book is actually information inside this guide incredible fresh, you will get facts which is getting deeper an individual read a lot of information you will get. This Semantic Models for Multimedia Database Searching and Browsing (Advances in Database Systems) without we understand teach the one who examining it become critical in imagining and analyzing. Don't be worry Semantic Models for Multimedia Database Searching and Browsing (Advances in Database Systems) can bring any time you are and not make your carrier space or bookshelves' come to be full because you can have it within your lovely laptop even cellphone. This Semantic Models for Multimedia Database Searching and Browsing (Advances in Database Systems) having very good arrangement in word as well as layout, so you will not experience uninterested in reading.

#### **Virgil Arriola:**

The knowledge that you get from Semantic Models for Multimedia Database Searching and Browsing (Advances in Database Systems) is a more deep you searching the information that hide into the words the more you get interested in reading it. It does not mean that this book is hard to understand but Semantic Models for Multimedia Database Searching and Browsing (Advances in Database Systems) giving you thrill feeling of reading. The writer conveys their point in certain way that can be understood through anyone who read that because the author of this reserve is well-known enough. This kind of book also makes your own vocabulary increase well. Therefore it is easy to understand then can go along, both in printed or e-book style are available. We suggest you for having this Semantic Models for Multimedia Database Searching and Browsing (Advances in Database Systems) instantly.

#### **Hilary Williams:**

Would you one of the book lovers? If yes, do you ever feeling doubt if you are in the book store? Aim to pick one book that you never know the inside because don't ascertain book by its include may doesn't work here is difficult job because you are afraid that the inside maybe not since fantastic as in the outside appearance likes. Maybe you answer may be Semantic Models for Multimedia Database Searching and Browsing (Advances in Database Systems) why because the excellent cover that make you consider in regards to the content will not disappoint an individual. The inside or content is definitely fantastic as the outside or perhaps cover. Your reading 6th sense will directly show you to pick up this book.

#### **Dan Hanner:**

In this age globalization it is important to someone to acquire information. The information will make you to definitely understand the condition of the world. The condition of the world makes the information better to

share. You can find a lot of references to get information example: internet, magazine, book, and soon. You can view that now, a lot of publisher that will print many kinds of book. The book that recommended to you personally is Semantic Models for Multimedia Database Searching and Browsing (Advances in Database Systems) this book consist a lot of the information on the condition of this world now. This kind of book was represented how does the world has grown up. The vocabulary styles that writer use for explain it is easy to understand. The writer made some analysis when he makes this book. That's why this book ideal all of you.
