**Multilevel Modeling of Categorical Outcomes Using IBM SPSS (Quantitative Methodology Series)**
Ronald H Heck, Scott Thomas, Lynn Tabata

This is the first workbook that introduces the multilevel approach to modeling with categorical outcomes using IBM SPSS Version 20. Readers learn how to develop, estimate, and interpret multilevel models with categorical outcomes. The authors walk readers through data management, diagnostic tools, model conceptualization, and model specification issues related to single-level and multilevel models with categorical outcomes. Screen shots clearly demonstrate techniques and navigation of the program. Modeling syntax is provided in the appendix. Examples of various types of categorical outcomes demonstrate how to set up each model and interpret the output. Extended examples illustrate the logic of model development, interpretation of output, the context of the research questions, and the steps around which the analyses are structured. Readers can replicate examples in each chapter by using the corresponding data and syntax files available at www.psypress.com/9781848729568.

The book opens with a review of multilevel with categorical outcomes, followed by a chapter on IBM SPSS data management techniques to facilitate working with multilevel and longitudinal data sets. Chapters 3 and 4 detail the basics of the single-level and multilevel generalized linear model for various types of categorical outcomes. These chapters review underlying concepts to assist with trouble-shooting common programming and modeling problems. Next population-average and unit-specific longitudinal models for investigating individual or organizational developmental processes are developed. Chapter 6 focuses on single- and multilevel models using multinomial and ordinal data followed by a chapter on models for count data. The book concludes with additional trouble shooting techniques and tips for expanding on the modeling techniques introduced.

Ideal as a supplement for graduate level courses and/or professional workshops on multilevel, longitudinal, latent variable modeling, multivariate statistics, and/or advanced quantitative techniques taught in psychology, business, education, health, and sociology, this practical workbook also appeals to researchers in these fields. An excellent follow up to the authors' highly successful Multilevel and Longitudinal Modeling with IBM SPSS and Introduction to Multilevel Modeling Techniques, 2nd Edition, this book can also be used with any multilevel and/or longitudinal book or as a stand-alone text introducing multilevel modeling with categorical outcomes.

**From reader reviews:**

**Frances Heath:**

The book untitled Multilevel Modeling of Categorical Outcomes Using IBM SPSS (Quantitative Methodology Series) is the e-book that recommended to you to read. You can see the quality of the book content that will be shown to you. The language that author use to explained their ideas are easily to understand. The article author was did a lot of research when write the book, to ensure the information that they share for your requirements is absolutely accurate. You also could possibly get the e-book of Multilevel Modeling of Categorical Outcomes Using IBM SPSS (Quantitative Methodology Series) from the publisher to make you a lot more enjoy free time.

**Gail Rodriguez:**

The book with title Multilevel Modeling of Categorical Outcomes Using IBM SPSS (Quantitative Methodology Series) includes a lot of information that you can find out it. You can get a lot of advantage after read this book. This kind of book exist new know-how the information that exist in this book represented the condition of the world now. That is important to yo7u to be aware of how the improvement of the world. This particular book will bring you throughout new era of the globalization. You can read the e-book in your smart phone, so you can read the idea anywhere you want.

**Walter Knight:**

The particular book Multilevel Modeling of Categorical Outcomes Using IBM SPSS (Quantitative Methodology Series) has a lot associated with on it. So when you read this book you can get a lot of profit. The book was written by the very famous author. Tom makes some research previous to write this book. This kind of book very easy to read you may get the point easily after reading this book.

**Elizabeth Maez:**

Beside this Multilevel Modeling of Categorical Outcomes Using IBM SPSS (Quantitative Methodology Series) in your phone, it might give you a way to get closer to the new knowledge or information. The information and the knowledge you may got here is fresh from the oven so don't become worry if you feel like an previous people live in narrow commune. It is good thing to have Multilevel Modeling of Categorical Outcomes Using IBM SPSS (Quantitative Methodology Series) because this book offers to you personally readable information. Do you sometimes have book but you rarely get what it's about. Oh come on, that would not happen if you have this in your hand. The Enjoyable set up here cannot be questionable, like treasuring beautiful island. So do you still want to miss it? Find this book as well as read it from currently!
