## Biochar for Environmental Management: Science, Technology and Implementation

Biochar is the carbon-rich product which occurs when biomass (such as wood, manure or crop residues) is heated in a closed container with little or no available air. It can be used to improve agriculture and the environment in several ways, and its persistence in soil and nutrient-retention properties make it an ideal soil amendment to increase crop yields. In addition to this, biochar sequestration, in combination with sustainable biomass production, can be carbon-negative and therefore used to actively remove carbon dioxide from the atmosphere, with potentially major implications for mitigation of climate change. Biochar production can also be combined with bioenergy production through the use of the gases that are given off in the pyrolysis process.

The first edition of this book, published in 2009, was the definitive work reviewing the expanding research literature on this topic. Since then, the rate of research activity has increased at least ten-fold, and biochar products are now commercially available as soil amendments. This second edition includes not only substantially updated chapters, but also additional chapters: on environmental risk assessment; on new uses of biochar in composting and potting mixes; a new and controversial field of studying the effects of biochar on soil carbon cycles; on traditional use with very recent discoveries that biochar was used not only in the Amazon but also in Africa and Asia; on changes in water availability and soil water dynamics; and on sustainability and certification. The book therefore continues to represent the most comprehensive compilation of current knowledge on all aspects of biochar.

### **From reader reviews:**

#### **Cecil Andrade:**

The particular book Biochar for Environmental Management: Science, Technology and Implementation has a lot of knowledge on it. So when you read this book you can get a lot of help. The book was authored by the very famous author. The writer makes some research just before write this book. This specific book very easy to read you can obtain the point easily after perusing this book.

#### **Michael Brown:**

The reason why? Because this Biochar for Environmental Management: Science, Technology and Implementation is an unordinary book that the inside of the publication waiting for you to snap that but latter it will shock you with the secret this inside. Reading this book adjacent to it was fantastic author who else write the book in such amazing way makes the content inside easier to understand, entertaining means but still convey the meaning thoroughly. So , it is good for you because of not hesitating having this nowadays or you going to regret it. This excellent book will give you a lot of benefits than the other book have got such as help improving your talent and your critical thinking approach. So , still want to hold off having that book? If I ended up you I will go to the publication store hurriedly.

#### **Brenda Hedstrom:**

Playing with family in a very park, coming to see the ocean world or hanging out with close friends is thing that usually you will have done when you have spare time, in that case why you don't try point that really opposite from that. One particular activity that make you not sensation tired but still relaxing, trilling like on roller coaster you are ride on and with addition associated with. Even you love Biochar for Environmental Management: Science, Technology and Implementation, it is possible to enjoy both. It is good combination right, you still wish to miss it? What kind of hang type is it? Oh can occur its mind hangout men. What? Still don't have it, oh come on its known as reading friends.

#### **Lorene Williamson:**

This Biochar for Environmental Management: Science, Technology and Implementation is brand new way for you who has intense curiosity to look for some information since it relief your hunger associated with. Getting deeper you in it getting knowledge more you know otherwise you who still having bit of digest in reading this Biochar for Environmental Management: Science, Technology and Implementation can be the light food in your case because the information inside this particular book is easy to get by simply anyone. These books build itself in the form which can be reachable by anyone, yep I mean in the e-book application form. People who think that in reserve form make them feel tired even dizzy this guide is the answer. So you cannot find any in reading a publication especially this one. You can find what you are looking for. It should be here for you actually. So , don't miss this! Just read this e-book variety for your better life and knowledge.
