Manual de anestesia clínica (Spanish Edition) Paul Barash, Bruce F. Cullen, Robert Stoelting, Michael Cahalan, M. Christine Stock, Rafael Ortega

La 7.ª edición de Manual de Anestesia Clínica presenta el contenido del conocido Clinical Anesthesia en un formato de esquema conciso con apéndices adicionales. Con uso generalizado de tablas, gráficos y claves clínicas, tiene el objetivo mejorar el acceso rápido de la materia. Esta completa referencia con tamaño de bolsillo guiará al lector a través de casi todos los aspectos de la atención perioperatoria, intraoperatoria y postoperatoria de los pacientes.

Cualquier persona familiarizada con la anestesia clínica de Barash sabe que es probablemente el único libro con el máximo de información sobre todos los aspectos de la anestesia. No obstante, muchas veces se detecta un exceso información incompatible con la necesidad de conocer el panorama general de la información o de encontrarla rápidamente. Ahí es donde entra en juego este manual. El manual hace un uso intensivo de los cuadros y gráficos (muchos, pero no todos, directamente del libro de texto).

El manual cumple con los requerimientos de los proveedores de atención de salud al ofrecer la información esencial contenida en el libro de texto principal, Clinical Anesthesia, en un formato más manejable. Incluso con la llegada de los ordenadores personales, los teléfonos inteligentes y las tabletas, el manual sigue teniendo un papel vital.

QUE LE DIFERENCIAN DE LA ANTERIOR EDICIÓN

- Contiene un nuevo capítulo sobre cirugía laparoscópica y robótica.
- Los apéndices se presentan en una nueva interfaz gráfica para mejorar la comprensión de los temas.
- Dos apéndices son nuevos: atlas de electrocardiografía y marcapasos implantables y protocolos para desfibrilación cardíaca.
- Esta nueva edición trae consigo imágenes a color y gráficos. El papel es de mejor calidad y el contenido, lo más importante, es el mismo pero mejorado. Precisamente el contenido siempre ha sido lo más destacable de la obra, que ahora se optimiza con una mejor presentación gráfica.

OTRAS CUESTIONES

- Aproximadamente el 20% de los capítulos están escritos por los nuevos contribuyentes al libro de texto principal, aunque reorganizados y reescritos en un estilo necesario para el alcance apropiado del manual.

-Es muy fácil encontrar lo que uno necesita. La información se compacta, pero lo suficiente para poder tener una idea bastante clara de un tema en particular.
