Antimalarial Agents: Chemistry And Pharmacology (Medicinal Chemical Monograph)

Poul Thompson

Antimalarial Agents: Chemistry And Pharmacology (Medicinal Chemical Monograph) Poul Thompson Medicinal Chemistry, Volume 12: Antimalarial Agents: Chemistry and Pharmacology presents the essentials of both biology and chemistry pertinent to the chemotherapy of malaria. This book discusses the nature of the disease, the physiology and biochemistry of the plasmodia, and the mode of action of drugs.

Organized into 19 chapters, this volume begins with an overview of the most intensive efforts to develop synthetic antimalarial drugs. This text then examines how drugs are evaluated as well as the specific chemotherapy in malaria. Other chapters consider the diversity of chemical structures exhibiting antimalarial activity with emphasis on structure-activity relationships and methods of synthesis. This book discusses as well the plasmodial effects by quinine in vivo. The final chapter deals with the miscellaneous structures known to have activity against some types of plasmodial infection in animals.

This book is a valuable resource for chemists and biologists involved in the development of antimalarial drugs.

From reader reviews:

Cheri Whaley:

Book is actually written, printed, or illustrated for everything. You can understand everything you want by a reserve. Book has a different type. To be sure that book is important matter to bring us around the world. Next to that you can your reading expertise was fluently. A e-book Antimalarial Agents: Chemistry And Pharmacology (Medicinal Chemical Monograph) will make you to become smarter. You can feel much more confidence if you can know about almost everything. But some of you think in which open or reading a new book make you bored. It isn't make you fun. Why they could be thought like that? Have you seeking best book or ideal book with you?

Edna Davis:

Spent a free a chance to be fun activity to complete! A lot of people spent their spare time with their family, or their particular friends. Usually they doing activity like watching television, likely to beach, or picnic from the park. They actually doing ditto every week. Do you feel it? Would you like to something different to fill your current free time/ holiday? Can be reading a book is usually option to fill your free of charge time/ holiday. The first thing that you will ask may be what kinds of guide that you should read. If you want to try out look for book, may be the guide untitled Antimalarial Agents: Chemistry And Pharmacology (Medicinal Chemical Monograph) can be good book to read. May be it might be best activity to you.

Diane Welton:

People live in this new day time of lifestyle always try to and must have the free time or they will get wide range of stress from both everyday life and work. So , if we ask do people have time, we will say absolutely of course. People is human not really a huge robot. Then we inquire again, what kind of activity are there when the spare time coming to you of course your answer may unlimited right. Then do you try this one, reading textbooks. It can be your alternative with spending your spare time, the book you have read is actually Antimalarial Agents: Chemistry And Pharmacology (Medicinal Chemical Monograph).

William Reyes:

What is your hobby? Have you heard in which question when you got learners? We believe that that concern was given by teacher to the students. Many kinds of hobby, Every person has different hobby. Therefore you know that little person including reading or as studying become their hobby. You must know that reading is very important in addition to book as to be the point. Book is important thing to include you knowledge, except your own personal teacher or lecturer. You will find good news or update about something by book. Numerous books that can you take to be your object. One of them are these claims Antimalarial Agents: Chemistry And Pharmacology (Medicinal Chemical Monograph).
