Reforming the Public Sector: How to Achieve Better Transparency, Service, and Leadership (Brookings-SSPA Series on Public Administration)

Many countries are still struggling to adapt to the broad and unexpected effects of modernization initiatives. As changes take shape, governments are challenged to explore new reforms. The public sector is now characterized by profound transformation across the globe, with ramifications that are yet to be interpreted. To convert this transformation into an ongoing state of improvement, policymakers and civil service leaders must learn to implement and evaluate change. This book is an important contribution to that end.

Reforming the Public Sector presents comparative perspectives of government reform and innovation, discussing three decades of reform in public sector strategic management across nations. The contributors examine specific reform-related issues including the uses and abuses of public sector transparency, the "Audit Explosion," and the relationship between public service motivation and job satisfaction in Europe.

This volume will greatly aid practitioners and policymakers to better understand the principles underpinning ongoing reforms in the public sector. Giovanni Tria, Giovanni Valotti, and their cohorts offer a scientific understanding of the main issues at stake in this arduous process. They place the approach to public administration reform in a broad international context and identify a road map for public management.
