## **The Play of Consciousness in the Web of the Universe (Quest Book)** Edward L Gardner

When ideas are based on fundamental truths, their value must remain undiminished with the passing of time. Such is the case with this theosophical classic. Edward L. Gardner, a man of extraordinary sensitivity, offers his views on creation and consciousness. Creation: Why it happened and how it is structured. Consciousness: What it is and how it evolves. This is a book about the web-like fabric which carries within itself all the material forms of the world; bears and supports them eternally. This is a book about life and light, which is consciousness becoming self-conscious, becoming transpersonally conscious. Based closely on 'The Stanzas of Dzyan' from H.P. Blavatsky's *The Secret Doctrine*, Gardner's contribution to truth can be a most valuable tool for all serious seekers into the nature of Reality.
