Raspberry Pi and AVR Projects: Augmenting the Pi's ARM with the Atmel ATmega, ICs, and Sensors (Make) Cefn Hoile, Clare Bowman, Sjoerd Dirk Meijer, Brian Corteil, Lauren Orsini, Troy Mott

As an incredibly cheap, credit-card sized computer, the Raspberry Pi is breaking down barriers by encouraging people of all ages to experiment with code and build new systems and objects; and this book provides readers with inspiring and insightful examples to explore and build upon. Written for intermediate to seasoned Raspberry Pi users, this book explores four projects from around the world, explained by their makers. These projects cover five major categories in the digital maker space: music, light, games, home automation, and the Internet of Things.

From reader reviews:

Marco Roy:

Often the book Raspberry Pi and AVR Projects: Augmenting the Pi's ARM with the Atmel ATmega, ICs, and Sensors (Make) will bring one to the new experience of reading a book. The author style to explain the idea is very unique. If you try to find new book to read, this book very suited to you. The book Raspberry Pi and AVR Projects: Augmenting the Pi's ARM with the Atmel ATmega, ICs, and Sensors (Make) is much recommended to you to learn. You can also get the e-book in the official web site, so you can easier to read the book.

Romana Linder:

Playing with family within a park, coming to see the coastal world or hanging out with close friends is thing that usually you will have done when you have spare time, and then why you don't try matter that really opposite from that. One particular activity that make you not sensation tired but still relaxing, trilling like on roller coaster you already been ride on and with addition info. Even you love Raspberry Pi and AVR Projects: Augmenting the Pi's ARM with the Atmel ATmega, ICs, and Sensors (Make), you can enjoy both. It is good combination right, you still would like to miss it? What kind of hang type is it? Oh come on its mind hangout people. What? Still don't buy it, oh come on its referred to as reading friends.

Billie Luster:

As a pupil exactly feel bored to reading. If their teacher asked them to go to the library as well as to make summary for some guide, they are complained. Just little students that has reading's heart or real their passion. They just do what the teacher want, like asked to go to the library. They go to generally there but nothing reading really. Any students feel that examining is not important, boring and also can't see colorful photographs on there. Yeah, it is being complicated. Book is very important in your case. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. So , this Raspberry Pi and AVR Projects: Augmenting the Pi's ARM with the Atmel ATmega, ICs, and Sensors (Make) can make you experience more interested to read.

Barbara Figueroa:

Many people said that they feel bored stiff when they reading a book. They are directly felt the idea when they get a half parts of the book. You can choose the book Raspberry Pi and AVR Projects: Augmenting the Pi's ARM with the Atmel ATmega, ICs, and Sensors (Make) to make your own personal reading is interesting. Your current skill of reading talent is developing when you just like reading. Try to choose easy book to make you enjoy you just read it and mingle the opinion about book and looking at especially. It is to be first opinion for you to like to available a book and read it. Beside that the guide Raspberry Pi and AVR Projects: Augmenting the Pi's ARM with the Atmel ATmega, ICs, and Sensors (Make) can to be your friend

when you're truly feel alone and confuse with what must you're doing of that time.
