Psychopharmacoendocrinology and Depression Research Gregor Laakmann

1.1 Outline of the Study In this study the influence of psychotropic drugs on anterior pituitary hormone (APR) secretion was investigated in healthy subjects and in depressed patients. The basis for this study is formed by pharmacological investigations which indicate that the therapeutic effect of psychotropic drugs can be attributed to their functional influence on central nervous aminergic impulse transmission (stimuli) as well as by endocrinological investigations which show that central nervous aminergic neurons influence APR secretion in man. The purpose was to find out if psychotropic drugs with differing pharmacological actions also influence APR secretion differently, even though the complex processes of central nervous stimuli transmission, the effect of psychotropic drugs on these processes, as well as the action of aminergic neuronal systems on APR secretion are not completely understood. Furthermore, it was investigated if it is possible to reach conclusions on the effects of drugs on central nervous aminergic neurons based upon APR secretion data. Specifically, the effects of various antidepressants, neuroleptics, and benzodiazepine-type tranquilizers on the secretion of growth hormone (GR), prolactin (PRL), adrenocorticotrophic hormone (ACTR), and cortisol were investigated in healthy male subjects. The first part of this study presents in detail the results of these experiments and also incorporates the results of other investigators. It is endeavored to answer the question whether and to what extent the different psychotropic drugs influence APR secretion and whether the APR secretion profiles of the different psychotropic drugs can serve as a possible pharmacoendocrinological model in humans.

From reader reviews:

Helen Palmer:

Hey guys, do you would like to finds a new book to see? May be the book with the title Psychopharmacoendocrinology and Depression Research suitable to you? Typically the book was written by famous writer in this era. Typically the book untitled Psychopharmacoendocrinology and Depression Research is one of several books that will everyone read now. This kind of book was inspired many people in the world. When you read this book you will enter the new dimensions that you ever know prior to. The author explained their thought in the simple way, so all of people can easily to know the core of this e-book. This book will give you a large amount of information about this world now. To help you to see the represented of the world within this book.

Annie Adcock:

Psychopharmacoendocrinology and Depression Research can be one of your basic books that are good idea. Many of us recommend that straight away because this reserve has good vocabulary that will increase your knowledge in language, easy to understand, bit entertaining however delivering the information. The author giving his/her effort that will put every word into pleasure arrangement in writing Psychopharmacoendocrinology and Depression Research nevertheless doesn't forget the main point, giving the reader the hottest and also based confirm resource information that maybe you can be considered one of it. This great information could drawn you into fresh stage of crucial thinking.

Debra Capone:

What is your hobby? Have you heard this question when you got learners? We believe that that issue was given by teacher for their students. Many kinds of hobby, Everybody has different hobby. And you also know that little person including reading or as studying become their hobby. You need to understand that reading is very important in addition to book as to be the issue. Book is important thing to include you knowledge, except your teacher or lecturer. You will find good news or update in relation to something by book. Amount types of books that can you decide to try be your object. One of them is niagra Psychopharmacoendocrinology and Depression Research.

Andrea Quirk:

Reading a publication make you to get more knowledge from that. You can take knowledge and information from the book. Book is created or printed or descriptive from each source that will filled update of news. In this modern era like now, many ways to get information are available for a person. From media social like newspaper, magazines, science guide, encyclopedia, reference book, fresh and comic. You can add your understanding by that book. Do you want to spend your spare time to spread out your book? Or just searching for the Psychopharmacoendocrinology and Depression Research when you required it?
